

LIGHTNING **Portable LED Message Sign**

AEL/SEL 030E-03-SIGN

The Ultra-Portable, Instant Signage Solution

The *LIGHTNING* Portable LED Message Sign has no equal in flexibility, size and setup speed. Capable of going places where conventional trailer-mounted changeable message signs never could, a *LIGHTNING* Sign can function indoors, outdoors, off-road and in the tightest of space – and on the tightest of budgets. Weighing only 31 pounds with its stand, it can be transported in the back of a car or SUV and can be set up by one person in minutes.

The *LIGHTNING* Portable LED Message Sign's multi-color LEDs are intense, grabbing attention on the sunniest day. Viewing distance is 200 feet (with 4-inch text size) and the viewing angle can be more than 60 degrees offcenter. The sign is capable of displaying a new message pattern instantly. Transfer stored messages to the sign via laptop / USB or WIFI via smartphone app.

LIGHTNING Portable LED Message Signs require no tools to set up and come ready to plug into any AC outlet for operation / battery charging. They will operate on an internal battery pack for more than 32 hours and will recharge in 8 hours. A *LIGHTNING* Sign can also be powered directly by 12VDC from a solar array or 120VAC from a generator.

Imminently Transportable

The sign display and accessories such as the stand can stow in optional tear and water-resistant carrying bags.

Applications, Portable & Fixed Formats

- Public Safety / First Responders – at incident perimeters for motorists and pedestrians.
- Public Health Departments – in vehicle lines approaching Points of Dispensing (PODs).
- Street / Highway Departments – where drivers encounter detours due to construction or infrastructure failures.
- Campuses (school, industry, healthcare, government) – in fixed locations both on and off property. For instant activation in an emergency. Wireless operation.
- Airports – at entrances and/or security points, parking lots, airside for aircraft info at taxiways or gates.
- Hospitals, Public Venues, Events – parking lot entrances, lobby areas.
- Commercial / Industrial – loading docks, parking lots and surface streets to direct motorists and truckers.
