

How to Win a RadioSTAT Portable Emergency Advisory Radio Station from Information Station Specialists (ISS)

RADIOSTAT GIVEAWAY RULES

NO PURCHASE IS NECESSARY TO WIN. There is no entry fee, contribution or monetary obligation of any kind required to enter or win. The approximate value of the prize is \$10,535.00, which includes a base RadioSTAT station, system engineering, planning, FCC licensing service and freight to the winning agency – all provided by ISS.

To enter, complete the entry form provided by ISS or give ISS a business card, stating that you wish to enter the RadioSTAT Giveaway. Entry forms or business cards must be completed and received by ISS on or by December 1, 2009, the closing date for the drawing. On December 15, 2009, an ISS designate will randomly draw the winner and will notify the winning agency personally as well as announce the winning entry on the front page of www.theRADIOsource.com.

1. The Giveaway is open to State, Local and Tribal Government Agencies within the United States and its territories who provide to the general public health, safety, emergency management and other health-related services. The winning agency must qualify for Federal Communications Commission licensing according to FCC Part 90.242 Rules.** FCC licensing services are part of the prize package ISS provides.
2. Any individual or entity may enter the name of an eligible agency in the drawing. For example, a private hospital that desires to use RadioSTAT may submit the name of their associated government agency (such as their city or county) in the drawing.
3. Only one entry per agency will be considered for the drawing. Incomplete entries will be disqualified. Decisions of the ISS Giveaway judges are final. All entries shall become the property of ISS. ISS is not responsible for lost, misdirected or delayed entries. Entries received by telephone will not be accepted.
4. ISS employees, representatives and their immediate family members are ineligible. ISS customers who presently own RadioSTAT stations are ineligible.
5. The prize is not redeemable in cash and must be accepted by an authorized agency representative as awarded. Identification must be produced upon request.
6. In accepting the prize, the winner acknowledges that ISS may not be held liable for any loss, damages or injury associated with accepting or using this prize. Any expenses relating to participation in the Giveaway or use of the prize are the sole responsibility of the winner.
7. Any and all applicable taxes associated with the prize are the obligation of the winner. As a condition of winning, receipt and use of the prize, the winner agrees to self-report to applicable local taxing authorities if required by law. If tax exempt, the winner agrees to complete applicable US tax withholding documentation if required. ISS will issue Giveaway-related tax reporting as required by law.
8. This Giveaway is subject to all federal, state and local laws, which take precedence in the event of conflict.
9. An authorized representative of the winning agency must sign a release form as prepared and accepted by ISS acknowledging acceptance and understanding of these Giveaway rules.
10. These detailed Giveaway rules, including Giveaway entry dates, how to enter, prize value and any restrictions applicable are available upon request from Information Station Specialists, Inc., in person and at its website www.theRADIOsource.com. ISS reserves the right to amend or interpret the rules or official Giveaway communications relating to the Giveaway at any time. ISS reserves the right to reasonably suspend or cancel the Giveaway.

* Because the number of entries to this Giveaway cannot be known with certainty until the entry period closes December 1, 2009, an exact statement of the odds of winning cannot be made. It is anticipated, however, that the odds will likely be greater than 1 in 100 but less than 1 in 500.

** The Federal Communications Commission grants licenses for RadioSTAT only to state, local and tribal government entities within the United States and its territories. Non-government entities such as service groups, hospitals, universities and labs, as well as HAZMAT and health service companies, may own and operate RadioSTAT stations in joint agreements with licensed government entities. The winning agency must already be FCC-licensed (or shall obtain a FCC license at no charge through ISS as part of the prize) in order to receive the RadioSTAT station.
