

InfOspot (Talking House) License-Free Radio Transmitter System

Custom Professional Packages

InfOspot – originally marketed as the Talking House® radio transmitter system – is the first professional, license-free radio station available for government, nonprofit and individual applications. It is the most affordable solution for local area broadcasting, offering the widest latitude in frequency flexibility, audio quality, broadcast content and programming convenience.

Designed to operate under FCC Part 15 Rules, InfOspot is capable of up to 100 milliwatts of power, yielding a range of up to 1/2 mile when mounted 20 feet above ground. The InfOspot System offers unprecedented flexibility and affordability when compared to higher powered, licensed systems:

- No FCC license is required. It is certified under FCC Rules Part 15.219.
- Any program content may be broadcast, including information, music or commercials.*
- Any AM frequency 540-1700 kHz may be utilized. The frequency is easily changed using front panel controls. *
- InfOspot Systems utilize the most trusted, time tested Part 15 Transmitter to generate the broadcast signal.
- The system's [Range Extender Outdoor Antenna and Tuner](#) may be mounted at any height above the ground, due to the exclusive coaxial Transmitter-to-Antenna linkage. [To learn more, see our easy-to-use instruction manual.](#)
- Integral 5-minute / dual message digital voice recorder / player for simplified message creation.
- Security key prevents unauthorized transmitter control tampering.

The Complete System

The InfOspot System Includes the TH.5 Transmitter with digital voice recorder / player, range extender outdoor antenna and tuner with mount and 25' of RG6 coaxial cable.

Custom Options

Line Conditioner Kit adds isolation from noisy power or audio connections.

External Digital Audio Player allows operation via USB/Flash drive for highest quality and convenience allows operation via USB/Flash drive for highest quality and convenience. **Audio Adapter** adapts XLR cables from mic or sound source to 3.5 mm (1/8") to plug directly into the InfOspot transmitter.

Additional Coaxial Cable in various standard lengths.

Audio Management Software for message creation, processing and for upload to one or multiple stations via network / wireless.

Dynamic Hand Microphone for high quality live broadcasts and recordings on the transmitter's internal digital audio player.

SMR Receiver for FCC compliance tests. Includes batteries and correlation chart.

Quick-Setup Stand gets Range Extender up quickly in a parking lot, on a flat roof, in a yard, etc. Add sandbags or blocks on the feet for stability if needed. Light weight and portable, it includes a fiberglass mast that telescopes up to 19' for maximum range.

Transmitter Only If a signal range of up to 250' is required or operation is indoors, the TH.5 Transmitter can be obtained without the Range Extender.. Instead, a 3-meter wire antenna is included that works in conjunction with the transmitter's internal auto-tuner.

PC Mic and Headphones for laptop to use with external digital message player.

Indoor / Outdoor Cabinet to house transmitter and audio components. Includes 19" rack rails.

Portability Package Deploy without delay. Add a rolling carry case with a power strip to incorporate your InfoSpot options.

Range Extender Only If you already own an InfoSpot Transmitter and want to convert it to enhance quality and range, order the Range Extender separately.

Plan Your Station

To plan your station's configuration and/or obtain a quote. [Email](#) or call 616.772.2300, extension 102.

InfoSpot technology is used by these types of organizations:

- **Airports** for parking and construction information; for tower-pilot communications at landing/take-off observation areas.

Purchasing

Contact us to plan a station configuration for your application. See customer-use examples at our website: www.theRADIOsource.com/products/infoSpot.htm.

Sole Source. We frequently are the only source for the products and services we offer and can send you support letters to affirm that for your purchasing documentation.

HGACBuy. If you are a state or local government agency anywhere in the US and you are a HGACBuy cooperative member - or want to join as an end user - you can purchase our products without the necessity of going out to bid. Membership is free to villages, towns, cities, townships, counties, state agencies, departments, authorities, districts, councils or nonprofits doing work for such entities.

Competitive Process. If you must seek competitive bids or quotes, we can supply specifications (in text form) so you can easily integrate them into bid documents.

Purchases by Governmental Entities can be made by purchase order, agency order on letterhead, VISA/MC (up to \$3,500) or simply by signing and returning our quote sheets. Standard terms are Net 30 days.

Service

Within 30 days from the order date, you may return to us (in original condition with original packaging) any new InfoSpot product, requesting service, replacement or a refund (minus Information Station Specialists' original freight and handling). Repairs and labor required to bring a returned product back to marketable condition may be subtracted from a requested refund.

You must contact us (info@theRADIOsource.com; 616.772.2300 x106) before shipping the product back to receive instructions and a RMA (Return Merchandise Authorization).

() FCC rules do not allow the broadcast of objectionable content or the use of a frequency that causes interference to other radio stations.*
